

*Design made to last*  
*2022/2023*

# *Collection 22/23*

The 2022 collection from Design For The People marks the start of something new. We are delighted to present four new design collaborations with Danish designers that all contribute with new, creative designs in high-quality materials and new perspectives on the Danish design tradition. Our proud, lasting collaboration with many of our familiar designers continues to evolve into great designs and development of existing series.

The inspiration for this year's novelties comes from vintage Italian designs, where iconic silhouettes and distinctive and playful details are key. We explore elements from the contemporary Japandi-style where the balanced Japanese aesthetic meets the sleek, modern lines of the Scandinavian design tradition. We have been focusing on recognizable and organic shapes, geometric structures, and new materials such as Tyvek, that our designers have combined in new, exciting ways. However, the collection is still anchored in the Scandinavian minimalistic style with classic designs, mixed materials, and matt silky surfaces.

We strive to create timeless designs you will value for years to come. Items that are made to last and will become classics that can stand the test of time. The use of quality materials such as marble, opal glass and brass, combined with the use of natural colours and thought-out designs are the fruits of innovative thinking that enhances our lives and the spaces surrounding us.

For many decades, Danish design has received great recognition throughout the world. This year we have been honoured with yet another of the much-coveted Red Dot Design Awards for the beautiful Mobile pendant, designed by Maria Berntsen.

**We proudly present our beautiful new collection - Design made to last.**

*“Thanks to its easy-to-use mechanism, Mobile allows light to be distributed as needed while at the same time offering an impressive glare-free pendant luminaire.”*

Statement by the Red Dot Design Jury

# *Red Dot Design Award*

The Red Dot Award is one of the most recognized international design contests in the world and has been a quality stamp in the design industry since 1955.

Each year, Red Dot receives more than 17,000 entries from close to 60 countries, which will subsequently be reviewed and judged by a jury of 40 independent design experts.

The price is divided into three categories: Product Design, Design Concept and Communication Design. Red Dot is organized by Design Zentrum North Rhine Westphalia in Essen, Germany.

*Lookbook*  
*2022-2023*

*“I believe that instead  
of making trendy  
objects we should try  
to make objects  
that outlive trends”*

**Asger Risborg Jakobsen**  
Studied architecture at The Royal  
Danish Academy in Copenhagen

Based in Copenhagen, Denmark

# *Asger Risborg Jakobsen*

Even as a child Asger Risborg Jakobsen found joy in creating all kinds of tools that he played with in the fields and trees around his home. Later Asger chose to make his passion his way of living by studying architecture at The Royal Danish Academy in Copenhagen. After three years he felt the joy of designing fading away and needed a change.

This time, he wanted to try something completely different. Asger started studying medicine and quickly became fascinated with the architecture of the human body. He gradually rediscovered his joy of designing and now combines working in both fields. In his creative work, Asger finds inspiration in the simultaneous complexity and simplicity of nature – and he is driven by creating designs that outlive trends and that can endure everyday use over many years.

*"I find lighting fascinating. It is both a practical and essential tool that enables us to unfold our lives after the sun sets. At the same time, it is an aesthetic element that affects us and our surroundings. It transforms the appearance of materials and shapes. It changes the atmosphere. Everything changes with the light."*

With his strong focus on longevity in terms of durability, functionality and aesthetics, Asger Risborg Jakobsen is not subject to short-lived trends and tendencies.

*"I believe that instead of making trendy objects we should try to make objects that outlive trends. The objects we make will of course always reflect our time and in this way, nothing is genuinely timeless, but I aim to create contemporary classics."*

to explore the Hill series*

*“I wanted to create a lamp that combines the delicate qualities of rice paper lanterns with the durability to endure everyday use over many years.*

*I wanted to create a big lamp that could diffuse a lot of light in a comfortable way, but without blocking the view”*

Asger Risborg Jakobsen

## *Hill*

Hill is a large, geometric lampshade that fills the room without blocking the view. Created by Danish designer Asger Risborg, Hill is light as a cloud, but sharp as a rock. A lamp that is both complex and simple while creating a very soft light that spreads into the room in a calm, uniform way.

Learn more about Hill on page 119

# *Anker Studio*

## **Anker Studio**

Consists of designers Christian Troels  
and Jonas Birkebæk Poulsen both  
educated from Design School Kolding.

Based in Svendborg, Denmark

Danish design duo Anker Studio consists of Jonas Poulsen and Christian Troels Hansen. Both have been interested in creating and designing since childhood, which has resulted in a curious approach and a strong creative power in everything they do.

Jonas and Christian each take on different roles while working closely together. Their collaboration often helps them overcome the challenges that come up during the design process.

*"When you're two people working together, you're forced to say what you're thinking about out loud. That way it becomes real, and it forces you to make up your mind about it to a greater extent than when it's just thoughts in your head. When you articulate your problem out loud, you often find another perspective on the solution."*

For Anker Studio, good design is a design that people remember and fall in love with. Something that is part of a bigger story and that will be cherished for years. When working with lighting, Jonas and Christian find the balance between functionality and aesthetics fascinating.

*"The best thing about working with lighting is that it has a large range between functionality and art. Some lamps are only functional, while some are more emotionally and aesthetically driven. The emotionally driven pieces become like an art object in the home. That's what makes the work fun. There's room for differences".*

*“Some lamps are only functional, while some are more emotionally and aesthetically driven.*

*The emotionally driven pieces become like an art object in the home. That’s what makes the work fun.*

*There’s room for differences.”*

Anker Studio

## *Versale*

The Versale series by Anker Studio is the epitome of Scandinavian minimalism cut to the very core. A perfectly round shade with a uniform light surface only disturbed by the piercing frame. The whole series can easily create the perfect ambience anywhere you need a pleasant, glare-free light.

Learn more about Versale on page 112

*Watch the full ambience video  
to explore the Versale series*

*Watch the full ambience video  
to explore the Tullio series*

## *Tullio*

The Tullio pendant by Danish designers Anker Studio has a soft and arched mode of expression - recognisable shapes put together in a new, interesting combination. The three round shades are elegantly placed together creating a grand and sculptural design. Diffusers ensure a uniform light surface and a glare-free light.

**Rune Balle & Christian Bjørn**

Consists of designers Christian Bjørn and Rune Balle.

The duo has carried out a large number of creative design tasks for both national and international clients

Based in Copenhagen, Denmark

*“Quiet is better than loud.  
We like to create designs  
that are very simple.  
Designs that people  
feel safe about”*

## *Bjørn + Balle*

The designers combine minimalistic Scandinavian design with international trends. It's about image creation and recognizability. The overall identity of the product is its form, function, details, structure and materials, which all comes together. A product never stands alone but is part of an environment where the story being told supports the design.

Bjørn + Balle have both carried out a large number of design tasks for both national and international clients at many different areas, such as product design, furniture design, interior design, identity programs and exhibitions, and together they have great success with lighting design.

Bjørn + Balle has delivered a wide range of innovative technical solutions for the industry, as well as beautifully designed products for the consumer market.

## *Arcello*

With Arcello Danish design duo Bjørn + Balle has created an elegant portable light with a pleasant, downward facing light. The design is simple, yet distinct with a beautiful, uniform anodized surface from top to bottom. The lamp is easily charged with the included USB cable.

Learn more about Arcello on page 128

## *Norbi*

Danish design duo Bjørn + Balle has created Norbi. A minimalist pendant with an industrial touch. The matt shade is contrasted by a brushed steel detail that enables the shade to move up and down. Moving the shade up creates a diffused light that spreads into the room, and moving it further down centres the light downwards - creating the perfect lighting for different situations.

Learn more about Norbi on page 121

Blanche Floor, Brass 2120794035

Blanche 42 Pendant, Brass 2120773035

## *Blanche*

The Blanche series by Bjørn + Balle is carried out in a classic design with elegant art deco references. Brushed brass details encircle the opalized diffuser that emits a soft light both upwards and downwards. The slim design makes the pendant perfect above a dining table. Dimmable for obtaining the perfect light for every situation.

Learn more about Blanche on page 78

**Bønnelycke MDD**

A Multi-Disciplinary Design company  
with a desire to work constructively and innovatively

Based in Aarhus, Denmark

*“Great design is giving people what they want, and a little bit more”*

*Learn more  
about the designer*

## *Bønnelycke MDD*

Bønnelycke MDD was established in 1988. Driven by a nosurpressable urge and desire to work constructively and innovatively, Bønnelycke mdd started his career with the design of lamps, furniture and interior decorating.

Quickly, he became known as an unconventional architect with no whims and fancies. His ability to challenge and optimize the manufacturing process itself is to be found in Henrik's original professional background as a toolmaker. "It could be fun" and "of course it can be done" – are phrases often used in his company.

From day one, the core of his work has been to create products simply because they are needed. Designs by Bønnelycke MDD grow out of a specific need or requirement expressed by the customer – and by the general public as such. This has resulted in a comprehensive portfolio of projects and designs allowing the company to slowly but steadily expand over the years.

Nomi Wall, Black 2220171003

Nomi Floor, Black 2220194003

## *Nomi*

In the Nomi series, there is an obvious ease between the simple frame and adjustable lamp head. In this series, designer Henrik Bønnelycke has combined the minimalistic shape with innovative LED technology in a very convincing way. A beautiful aesthetic design language with the slim frame and robust base makes Nomi admirable, and will surely create joy year after year.

Learn more about Nomi on page 90

Nomi 5-pendant, Black 2220163003

## *Kaito Pro*

With Kaito Pro, Bønnelycke MDD has created a ceiling fixture that breaks with tradition. Here design and innovation merges into something greater. The shape stands out as sharp, modern and as a uniform, luminous surface. The functional kip joint in brass adds an elegant superiority to the design.

Learn more about Kaito Pro on page 134

## *Nobu*

Nobu is a reinterpretation of the classic architectural lamp, where the industrial expression and classical form are maintained. Nobu has integrated LED, which contributes to a good light output and simultaneously it is easy and convenient to turn the light on and off with the built-in touch function on the lamp head. In addition, Nobu has a flexible arm and lamp head, so you can direct the light to what you wish to light up. Nobu has lots of applications as both a table base, clamp and wall bracket are included. Nobu is suitable at the desk but can also be used as a bedside lamp or mounted on the wall in the kitchen. Design by Bønnelycke MDD.

# *Charlotte Høncke*

**Charlotte Høncke**

Holds a degree from Aarhus School  
of Architecture in Industrial Design

Based in Aarhus, Denmark

*“I like exploring new materials, shapes and techniques and I never choose the easy way out”*

Charlotte Høncke has always had a great passion for design and knew from a very early age that she wanted to pursue a career in design or architecture. In 2002 she graduated from Aarhus School of Architecture in Industrial Design, and a few years later she chose to become self-employed working with design full time.

Charlotte finds inspiration everywhere she goes – from nature, architecture or travelling the world. New ideas often require new methods for designing and creating which sometimes forces her to explore new ways.

*“I like exploring new materials, shapes and techniques and I never choose the easy way out. That sometimes causes challenges, both for me as a designer but also for the manufacturer. But exploring new methods is also what makes the job diverse and exciting.”*

Lighting design is something that Charlotte Høncke finds particularly interesting because of its versatility and the need for balancing functionality with aesthetics.

*“Besides having to provide the right, functional light, I also think lamps need to be beautiful when turned off. Lamps are one of the elements that bring most atmosphere into the interior, and I personally like to have many different types of lamps in my home to create just the light and atmosphere I want.”*

## *Caché*

With Caché, Danish designer Charlotte Hønlcke has created a table lamp with an intriguing and eye-catching design. The lamp is made from two perfectly round shades, united elegantly by a solid marble base. Caché creates an interesting and playful ambience where the light is reflected back and forth between the two shades.

Learn more about Caché on page 129

Hello Table, Brown 2220215009

Hello Table, Black 2220215003

## *Hello*

Hello by Danish designer Charlotte Hønlcke has a playful and welcoming design language and a classic, organic silhouette. The large shade beautifully embraces the opal white glass dome and can even be turned all the way around for a playful mix between direct and indirect light.

Learn more about Hello on page 130

Hello Table, Grey 2220215010

# Maple

Maple is designed by Danish designer Charlotte Høncke and its organic shapes are reminiscent of large flower petals, effortlessly embracing a cosy, evocative light. Maple is perfect above the dining table or in a dark corner that needs brightening up with an airy design that does not feel heavy or dominant in the room.

Learn more about Maple on page 119

*“I’m very proud of Maple. I really like the simple, organic shapes and the way the light unfolds and hits the shades.*

*It almost resembles large flower petals that embrace the light in an effortless way”*

Charlotte Høncke

Maple Pendant, Brown 2220293009

# Maria Berntsen

**Maria Berntsen**

Holds degrees from both  
The Royal Danish Academy Art  
and L'Ecole d'Architecture

Based in Copenhagen, Denmark

*Learn more  
about the designer*

*“To me, success is when  
my design brings joy in  
the everyday lives of people”*

With her own design studio in Copenhagen, Maria Berntsen has since 1992 focused on architecture and design. Maria Berntsen is a well-established name in the design industry and has over the years collaborated with a wide range of Danish and international companies, where her extensive experience has resulted in many successful designs.

“At the start of a new project, I look for an idea with nerve, functionality and identity. By modelling and visualizing, I test the idea, how it might be used, and its presence.

Good design communicates and establishes a dialogue with the receiver. Design is not just about functionality – it is as much about the emotional connection and impact. To me, success is when my design brings joy in the everyday lives of people”

## *Glossy*

Glossy is the epitome of tasteful and sophisticated design. Danish designer Maria Berntsen has created a table lamp that oozes of Nordic minimalism, where the combination of brushed steel and opal white glass contributes to an incredibly elegant design. Glossy is named after the shiny surface of the opal white glass, which lets a soft and comfortable light shine through.

[Learn more about Glossy on page 130](#)

*"Glossy is my favourite lamp. I feel that it successfully balances form and a mix of materials. The entire construction and expression of the lamp is simple and timeless.*

*It makes me proud and incredibly happy that the design has been acknowledged with a Red Dot Award"*

Maria Berntsen

Align Table, Green 2120095023, Beige 2120095009, Dusty Rose 2120095057, Brown 2120095018, Chrome 2120095033

Align Table, Green 2120095023

Align Table, Beige 2120095009

## *Stay*

Stay is designed by Maria Berntsen and is a modern, yet timeless lighting design at the same time. The oblique cut of the shade creates an open and pointing shape that allows for lots of light to shine through. The Stay wall light emits a soft, comfortable light both upwards and downwards – creating the perfect light for your bedside or kitchen table.

Learn more about Stay on page 102

# *Studio Mavro//Lèfevre* *by Sofie Lèfevre*

*Learn more  
about the designer*

**Sofie Lefèvre**

Holds a degree in Innovation  
Design from Royal College of Art

Based in Copenhagen, Denmark

*“I generally like challenges. Challenges create a sense of suspension, even though I know that it’s almost always possible to find a solution – it’s really just a matter of time”*

The road to becoming a designer has not been straight ahead for Sofie Lefèvre. She started studying medicine, but after a year changed her course and continued her education within the design field. Several years in London and a degree in Innovation Design from Royal College of Art gave her hands-on experience and the drive to pursue a career within design.

Working with lighting design comes naturally to Sofie. She understands and emphasizes the impact light has on our lives and is fascinated by the way light can change the interior: *“I find it very interesting working with atmospheres created by light. There are so many aspects where my inner child can be released, playing with angles, materials and openings to create the wanted reflection or diffusion of light.”*

## *Mademoiselles*

Mademoiselles by Danish design Studio Mavro//Lèfevre by Sofie Lèfevre has a fun and light-hearted design expression where the round, oversized shade is balanced by the solid, marble base. Light is reflected upwards onto the bottom of the shade, creating a soft, indirect ambience.

Learn more about Mademoiselles on page 131

*Watch the full ambience video  
to explore the Mademoiselles series*

# *Navone*

Navone is designed by Danish design Studio Mavro//Lèfevre by Sofie Lèfevre. The overall shape of the shade is soft and round, yet the very subtle curved bottom adds a new interesting dimension that transforms the lamp into more than just a sphere. The brass details add a contemporary touch, underlining the suspended lightness of the lamp.

Learn more about Navone on page 120

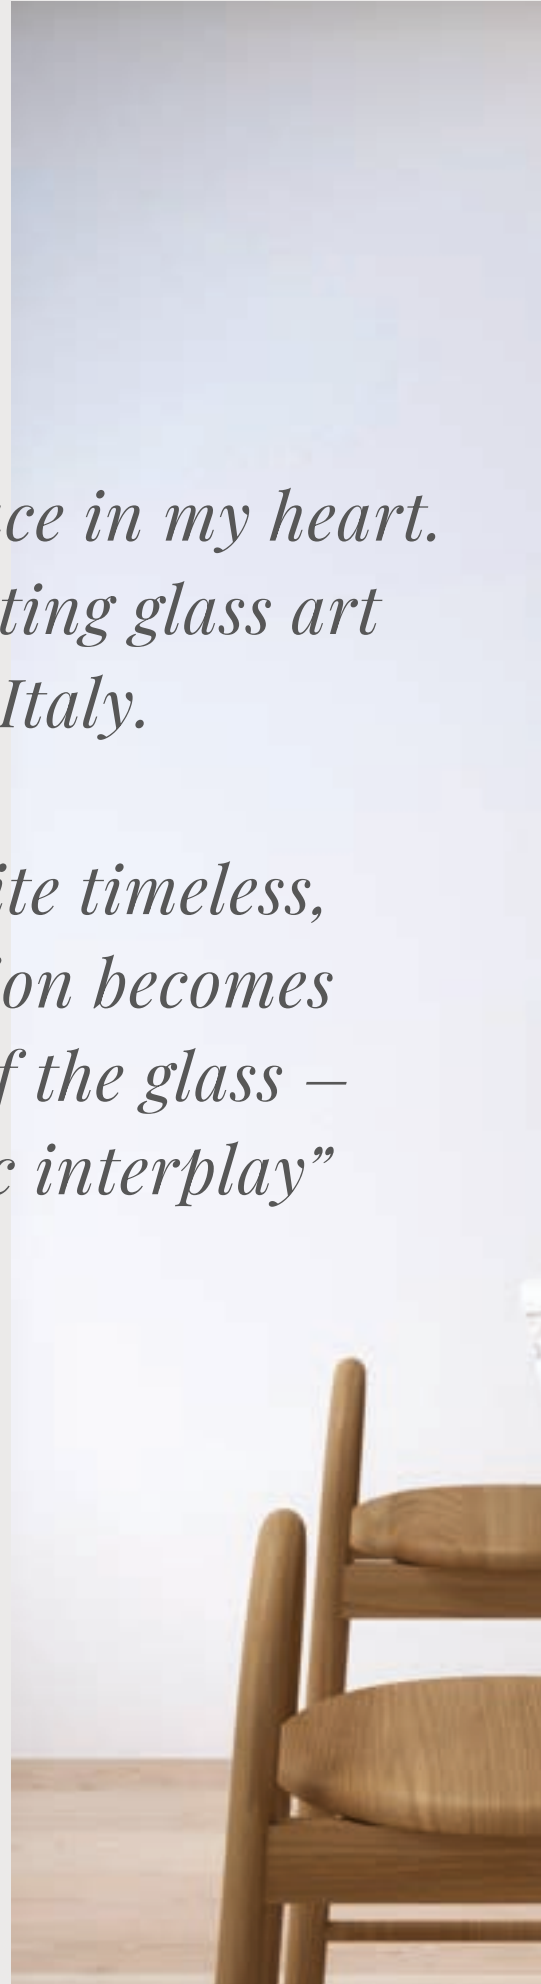

*Watch the full ambience video  
to explore the Navone series*

*“Navone holds a special place in my heart. It is inspired by the fascinating glass art from the Murano Island in Italy.*

*The design of Navone is quite timeless, and I love how the suspension becomes an extension of the shape of the glass – two shapes in one harmonic interplay”*

Sofie Lefèvre

## *Beau*

Designed by Danish design Studio Mavro//Lèfevre by Sofie Lèfevre, the Beau pendant is based on the idea of extruding the silhouette of a lamp horizontally in space. Beau has a slim, minimalist design that looks beautiful above a dining table or in the kitchen. Comes with a replaceable bulb.

Learn more about Beau on page 116
